- Writing word by word rather than spelling (reduce frustration)
- Optimizing each question
- Making it intuitive thanks to a simple interface
- The only requirement is a binary input

2017-04-05

Title
└ Introduction
└ The concept
└ Concept

Concept

- Writing word by word rather than spelling (reduce frustration)
- Optimizing each question
- Making it intuitive thanks to a simple interface
- The only requirement is a binary input

1. First, we thought about using something like "Akinator".
2. We've worked with designers.
3. Our software is indenpent of the binary input.

 - The Dicotomix's original approach
 - Demo
 - Demo

- Dichotomy over a dictionary (right/left signals)
- Frequencies of words taken into account
- We can deduce the prefix which is certain and mark it green.

2017-04-05

Title
└ The Dicotomix's original approach
└ Algorithm
└ Algorithm

Algorithm

- Dichotomy over a dictionary (right/left signals)
- Frequencies of words taken into account
- We can deduce the prefix which is certain and mark it green.

1. Explanations on the board !
2. This is espacially useful for error detection. We'll see later.

The proof that Dicotomix is fast !

2017-04-05

Title

└ The Dicotomix's original approach

└ Algorithm

└ The proof that Dicotomix is fast !

Assets

- Faster than spelling
- One can get better by training
- Could even have some fun playing with Dicotomix !

2017-04-05

Title

└ The Dicotomix's original approach

└ Algorithm

└ Assets / Drawbacks

Assets

- Faster than spelling
- One can get better by training
- Could even have some fun playing with Dicotomix !

1. We made a comparison between some existing methods and ours. This could also be proved theoretically.
2. This will be confirmed by the study.
3. The user is not as passive as in the methods described before.

Assets

- Faster than spelling
- One can get better by training
- Could even have some fun playing with Dicotomix !

Drawbacks

- It's hard to deal with mistakes
- Counter intuitive at the beginning (requires some training)
- Requires to be really focused
- What about proper names ?

2017-04-05

└ BCI (Brain Computer Interface)

BCI (Brain Computer Interface)

Initial Idea

Use of BCI for people who cannot move anything.

This was our initial idea. We decided to make a break with BCI and to focus on the software part. But we are currently working on it again with Stephan Roux and Amine Metani (physicians at ENS Lyon).

BCI (Brain Computer Interface)

Initial Idea

Use of BCI for people who cannot move anything.

Reality

Problem is having a good signal and then dealing with it was very hard !
